

Sales & Customer Analytics

Deraah Retail Group | SQL Server, Power BI, DAX

github.com/rehamessa/deraah-h1fy26-customer-analytics

Four questions the business needs answered

1

Is growth real?

How much of the sales growth is left once new stores are taken out?

2

Who drives revenue?

Which customers bring the sales, and do new customers come back?

3

Which stores need help?

Where are the strong and weak branches, by region, city and format?

4

Do promotions pay off?

Do they lift sales, or just discount sales that would have happened anyway?

From raw files to a dashboard in four layers

Why it matters: every number on the dashboard can be traced back to a raw row, and any cleaning rule can be changed in one place.

11 data quality issues found, logged and fixed

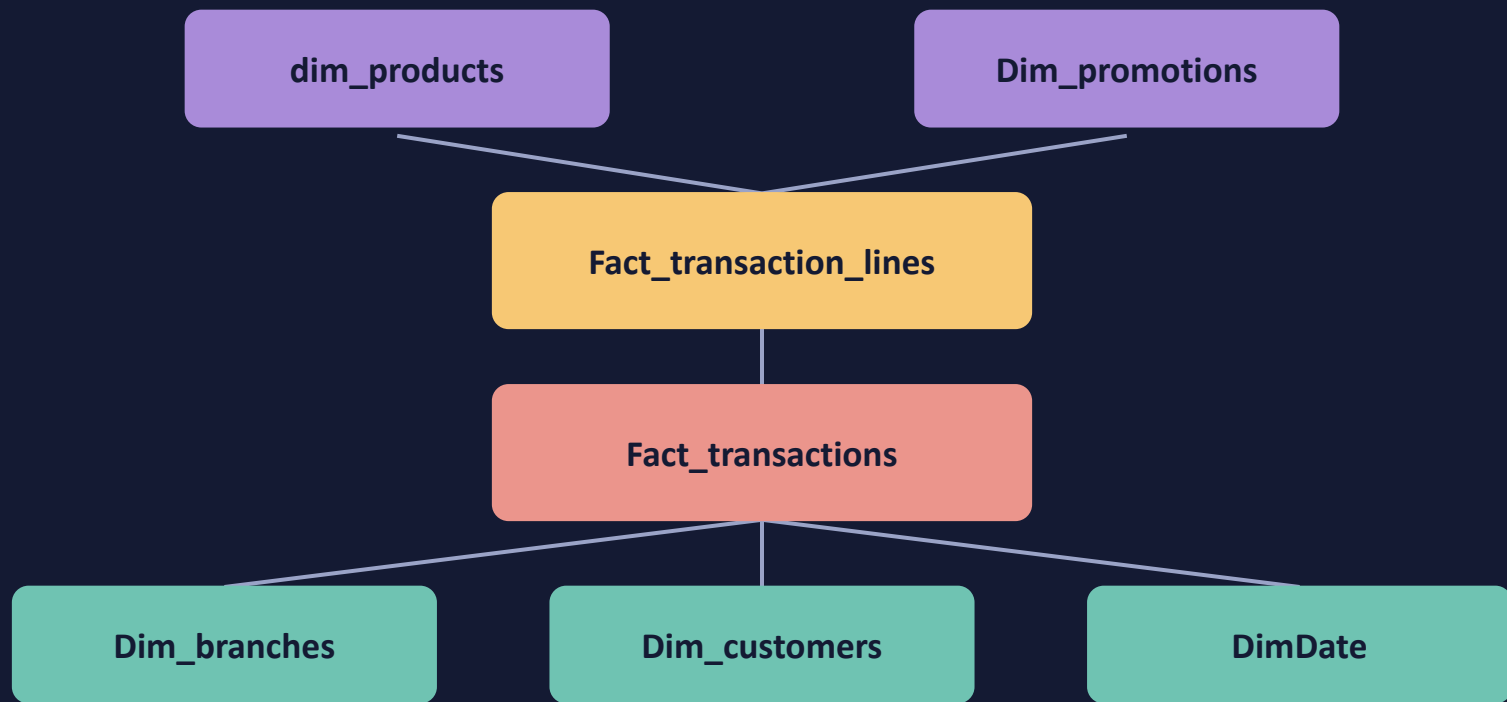

- Test branch B999 and all its lines removed
- Duplicate customers merged on lowercased email, earliest join date kept
- Duplicate transaction IDs removed
- Sales dated after the 30 Jun 2026 reporting date dropped
- Orphan SKUs with no product row dropped
- Mixed-sign discounts fixed with ABS()
- net_amount recomputed, is_return fixed where qty < 0

11

issues logged, each with a decision

Impact analysis shows what each issue would do to sales, customers and growth if left unfixed.

A star schema built for reporting

Plus RFM, CohortOffset and a measures table. DimDate is marked as the date table.

Executive: the big picture

- 14.4M SAR net sales, up 11.6% on last year
- Gross margin 62.7%, average basket 518 SAR
- Central leads regions at 5.0M; Oud leads categories at 4.9M

Customers: who carries the business

- Champions are 12% of customers but 28% of sales
- 76.4% of buyers came back for more
- Early cohorts: about a quarter still buying after 6 months

Promotions: did each one pay off?

- 8 promotions: 12.1% of sales, 1.14M SAR given in discounts
- Oud 2026: +153% vs +34% for other categories
- Ramadan started about 11 days earlier, so part of the lift is timing

Headline growth is not the same as real growth

HEADLINE GROWTH

+11.6%

all stores

COMPARABLE-STORE GROWTH

+5.9%

35 of 40 branches

About half of the headline growth comes from new stores. A branch counts as comparable only if it opened on or before 1 Jan 2025 and was still open on 30 Jun 2026.

Measures, drill-down and security

12 core DAX measures

- Net Sales
- Net Sales LY
- YoY %
- Average Basket
- UPT
- Gross Margin %
- Active Customers
- Repeat Rate %
- LFL Net Sales
- LFL Growth %
- Transactions
- Return Rate %

Built to be used

- Row-level security: a Region Manager sees only their region
- Custom HTML and SVG cards in a dusk theme
